STANDARD

SUPER 6

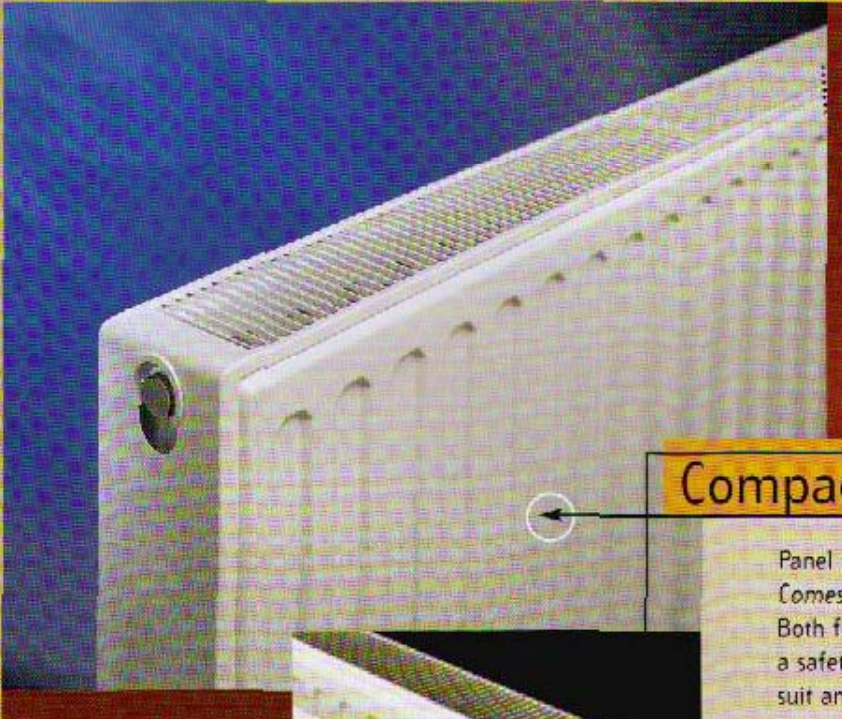

COMPACT

Standard

One of the most successful models from the Supera range.
Distinctive design with rounded corners.
Standard radiators come equipped with 4 or 6 welded brackets

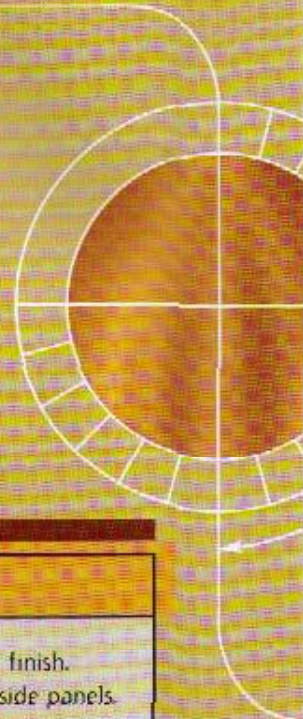

Compact

Panel radiator with superlative finish.
Comes with *exquisite* top and side panels.
Both for its esthetic appeal as well as from a safety point of view, a perfect choice to suit any home interior.

All compact radiators come equipped with 4 or 6 welded brackets

SUPERIA TOWEL DRY RACKS

Available in various lengths - 400 - 500 - 500 - 800 and 1.000.

SUPER 6 (universal valve compact)

Whether fitted on the left, the right or round the back, to suit a perfect overall fitting arrangement, the Super 6 radiator has been especially devised for the comfort you crave and deserve.

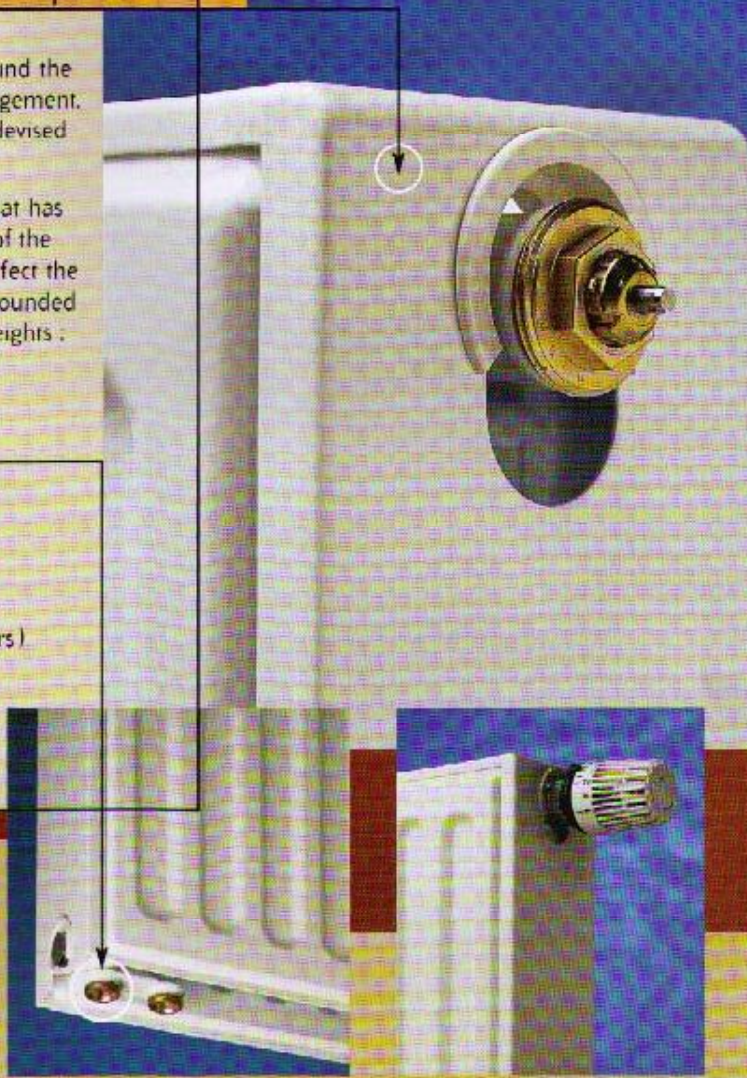

The epoxy lacquer coating (Ral 9010) that has been applied using the very highest state of the art technology, highlights to even better effect the esthetic and harmonious qualities of the rounded corners. This radiator comes in various heights : 300 - 400 - 500 - 600 - 800 and 1000.

INTEGRATED FITTING

The SUPERIA SUPER 6 radiator is THE consummate radiator your home interior deserves :

All SUPER 6 multi-position radiators come without suspension brackets (drop hangers) excepted type 10 & 11.

A valve insert can be ordered separately.

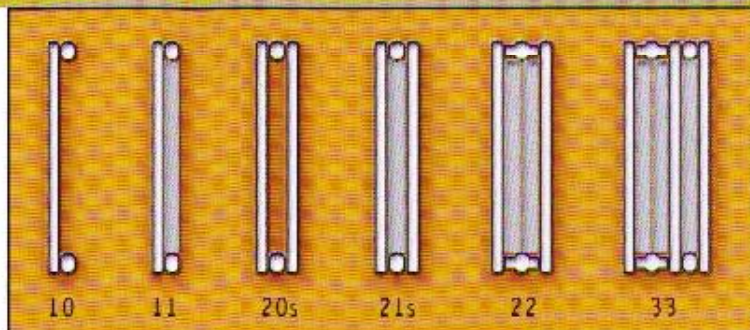

SUPERIA PANEL RADIATORS

Available in over 1.200 different types, catering to every conceivable requirement. Comes in 7 basic heights : 300, 400, 450 (Standard and Compact series only), 500, 600, 800 and 1.000 mm.

Lengthwise casings range from 450 up to 3.000 mm, in 150 mm increments.

In addition, Superia panel radiators come in 6 different manufacturing dimensions :

SUPERIA Radiators :

Excellent packaging

Transport damage is eliminated by using the latest packaging techniques. The radiators are wrapped in strong cardboard with corner protectors. Further protection is guaranteed by using plastic shrink wrapping, giving the radiator total protection.

Fast Deliveries

Due to the state of art high speed precision production lines with an unique cost performance ratio, we can guarantee fast deliveries to all our customers anywhere in Europe.

Good Communications

Superia customers can always rely on our organisation for punctual deliveries and for expert sales advice. We allocate one sales person for every account as a point of contact to ensure that each customer has continuity in trading arrangements.

SUPERIA RADIATORS :

WELCOME TO THE WORLD OF SUPERIA RADIATORS

Innovation as standard

Superia has based its entire range of products on the very latest technology available in Europe today. Unique innovative designs makes our company a leader in its field, meeting the very highest demands of our customers.

Design Concept

Every model in the Superia Range is produced with an eye on design. The rounded corners of the radiator ensures that the products blend in perfectly into any home.

High Output

Superia Radiators have very high output. The convector material is welded directly on to the water channels giving maximum efficiency levels.

High Quality Gloss Paint Finish

The radiators are painted in a two stage paint process. In stage one, the radiators are given a primer coat followed by scratch proof powder coating, giving the radiators a superb gloss finish.

Environmentally Friendly

During the manufacturing process, no pollutants are used at any time. All raw materials used can be recycled - even the radiator packaging is 100% reclaimable. Superia Radiators are in full agreement to European Environmental Law.
